ACADEMIC READING LABS 1–3 — SENTENCE, T/F/NG & HEADINGS

Read full passages in #reading (side-by-side split view) or review key evidence excerpts below.

Lab 1 · Municipal Bike-Share Scheme (#reading-practice · NO MORE THAN TWO WORDS AND/OR A NUMBER)

Excerpt: "…Commuters register at the main **ticket office**… free for the first **seven** minutes; standard **residents** pay ¥150 thereafter… funded by a **municipal grant**… riders under 16 must wear a safety **helmet**… **120** solar docking stations operate across the city, and lost passes must be reported within **48** hours."

Part A: 1 Register at: _____ 2 Free minutes: _____ 3 Free ride rank: _____ 4 Under-16 gear: _____ 5 Stations: _____

Part B Table: 1 Standard fee group: _____ 2 Funding source: _____ 3 Report lost card within: _____ hrs

Lab 2 · Artificial Coastal Lighting & Sea Turtles (#reading-tfng · TRUE / FALSE / NOT GIVEN + Notes)

Excerpt: "Hatchlings rely primarily on the bright horizon over open water rather than lunar phases… Cooler **sand** produces more males, whereas warmer nests yield more females [adult feeding migration routes are unstudied here]… Trials in Florida showed switching off beachfront hotel lamps alone failed until tall inland **streetlamps** visible above dunes were shielded; **windowless** pump houses needed zero changes."

1 Hatchlings depend mainly on the full moon: _____ 2 Warmer nests produce more females: _____

3 Adult males swim further than females: _____ 4 Hotel lights alone solved disorientation: _____ 5 Tourists fined: _____

Notes (ONE WORD): 1 Sex depends on _____ temperature · 2 _____ buildings unaffected · 3 Shield tall _____

Lab 3 · The Daydreaming Brain (#reading-headings · Matching Headings i–v + Summary)

Headings: **i** Consolidation during quiet waking **ii** Declining school test scores **iii** Surprising brain energy use at rest **iv** Productive vs ruminative mind-wandering **v** High cost of hospital scanners

- **Para A** (Default Mode Network burns nearly as much glucose at **rest** as on maths tasks): **[____]**
- **Para B** (Quiet waking replays new skills just after **learning**): **[____]**
- **Para C** (Deliberate daydreaming aids planning, whereas anxious loops harm **attention**): **[____]**

Summary (ONE WORD): 1 High brain activity at _____ · 2 Replays recent _____ · 3 Uncontrolled loops hurt _____

ACADEMIC READING LABS 4 & 5 — MATCHING, MCQ & YES/NO/NG

All remaining discursive & analytical Academic Reading question formats (#reading-matching · #reading-ynng)

Lab 4 · Bionic Limbs & Neural Interfaces (#reading-matching · Paragraphs A–D)

Summary Digest: **[A]** Early myoelectric prostheses failed because skin sweat disrupted surface sensors; MIT's **Hugh Herr** pioneered agonist-antagonist muscle pairs restoring natural proprioception. **[B] Todd Kuiken** redirected severed arm nerves to chest muscle so patients felt thumb pressure on their chest. **[C] Cynthia Chestek** amplified faint nerve signals inside tiny muscle grafts using machine-learning decoders. **[D]** Major hurdles remain: implanted batteries require surgery every few years, and countryside clinics lack calibration specialists — though shared open-source hardware and modular sockets cut replacement costs.

Part A Match Info (A–D, letters MAY repeat!): 1 Why skin sensors slipped: **[___]** · 2 Battery surgery limit: **[___]** · 3 Rural clinic gap: **[___]**

Part B Match Features (A Herr · B Kuiken · C Chestek): 1 Chest nerve sensation: **[___]** · 2 Muscle-graft ML amplifier: **[___]** · 3 Paired muscle feedback: **[___]**

Part C MCQ: Q1 Main limitation today = ☐ A weight ☐ **B** upkeep/access ☐ C rejection | Q2 Choose TWO cost reducers: ☐ **A** open-source ☐ B titanium ☐ **C** modular sockets ☐ D home surgery

Lab 5 · Congestion Pricing in Modern Cities (#reading-ynng · Writer's Claims YES / NO / NOT GIVEN)

Argument Digest: Critics claim road tolls punish low-income commuters; **however**, census data show outer-suburb low-wage workers already rely overwhelmingly on buses delayed by car gridlock, so congestion charges actually speed up their commute when revenues fund bus lanes. Retail lobbies predicted downtown shop closures, yet pedestrian footfall rose 14% after Stockholm's scheme stabilized (whether luxury boutiques outperformed cafés remains unmeasured). Crucially, cities must expand bus capacity **before** switching cameras on.

Part A (Write YES, NO, or NOT GIVEN): 1 Tolls mainly hurt low-income bus riders: _____ · 2 Bus lanes must come BEFORE tolls start: _____ · 3 Luxury shops gained more than cafés: _____ · 4 Downtown footfall rose after pricing settled: _____

Part B Sentence Endings: 1 Outer commuters **[___]** (A already use buses / B own 2 cars) · 2 Retail lobbies **[___]** (C feared sales drops) · 3 Toll revenue **[___]** (D should fund transit)

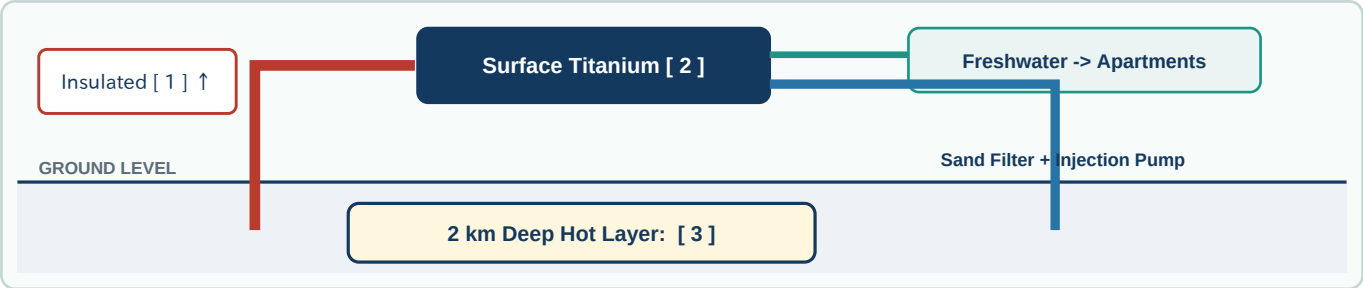

Part C Word-Bank Summary: **A** decline · **B** freeze · **C** growth · **D** penalty · **E** mobility → 1 predicted retail **[___]** · 2 actual footfall **[___]** · 3 faster bus **[___]**

ACADEMIC READING LAB 6 — DIAGRAM LABELLING & 11-TYPE CHECK

Technical passage + cross-section diagram completion (#reading-diagram)

Passage Excerpt: "Deep beneath impermeable caprock lies fractured hot **granite** rock at 200 °C. Cooled water is forced down an injection well by a high-pressure **injection pump**, percolates eastward through hot fractures, and rises up a deep **production well** to enter a surface **heat exchanger** that drives a binary turbine. Before returning underground, water passes through a fine **sand filter** to trap mineral grit."

Part A Diagram Labels (NO MORE THAN TWO WORDS):
Label [1]: _____ Label [2]: _____ Label [3]: _____

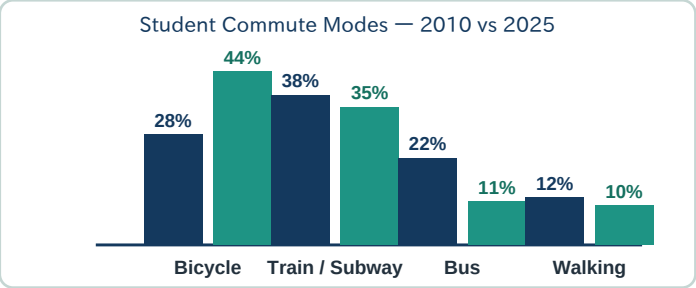

Part B Recirculation Flow-Chart (max 2 words): Turbine outlet → **(1)** _____ → **(2)** _____ → Injection well.
