TEACHER SCRIPTS & MASTER ANSWER KEY (v4 Academic)

先生用・音声なし授業対応スクリプト全11本＋全39クイズ完全解答集 ― Do not hand to students before practice!

> **No-Device Classroom Protocol:** Read each script **ONCE at natural speed** (pause only at commas/periods; do not over-stress answer words). For 2-speaker Scripts F & H, read with a colleague/student volunteer or step slightly left/right to distinguish voices.

Script A ― Trick Answers & MCQ (Listening Lesson 3 · #mission3 · 0:25)

Maya first booked the Monday session, **but** her work schedule changed, so she will attend on **Wednesday [1-B]** instead. Visitors used to gather at reception; **however**, building work means everyone should now meet at the **library entrance [2-C]**. The standard fee is fifty pounds, **although** early registration reduces it to **thirty-five pounds [3-A]**. Learners do not need a laptop or headphones, but they must bring a **notebook [4-B]**.

Script B ― Numbers, Stress & Spelling Dictation (Lesson 4 · #mission4 · pause 4s per item)

1. **thirteen** · 2. **thirty** · 3. **fifteen** · 4. **fifty** · 5. **18 June** · 6. **80 King Street** · 7. **Marco** (M-A-R-C-O) · 8. **Brighton** (B-R-I-G-H-T-O-N) · 9. **two tickets** · 10. **an affordable course**.

Script C ― Mini Review Test (Speaking Tab · #mission7 · read ONCE only)

The communication workshop will take place on **24 October [1]** in **Room 2B [2]**. The main topic is **confident speaking [3]**. Participants should bring **a notebook [4]**. There is **no charge [5]** for registered students.

Script F ― Part 1 Two-Speaker Registration Form Call (Lesson 5 · #mission-form · 1:04)

Leo: Hello! I am calling to join the evening swimming club for students. My first name is Leo, and my surname is **Chambers [1]** ― spelled C-H-A-M-B-E-R-S.
Receptionist: Welcome, Leo! I have our registration form open right here: Chambers, C-H-A-M-B-E-R-S. Could you give me your postcode, and tell me which day you were hoping to attend?
Leo: Sure, my postcode is **WS7 3PL [2]**. I was hoping for Tuesday evenings if possible, and I am a **beginner [3]** swimmer.
Receptionist: Got it ― WS7 3PL, level: beginner. Tuesday is completely full this term, I am afraid, so your class day will be **Thursday [4]** instead. Full-time students pay **£19 [5]** a month rather than the adult rate of £28, and please bring a **padlock [6]** for your locker on day one.

Script D ― Part 2 Campus Map Tour Guide (Lesson 6 · #mission-map · 1:08)

Welcome to Riverdale College! Right now we are standing at the **Main Gate** at the south entrance, facing north up the Central Path. First, if you need your ID card checked, the **Student Support Desk [1 = A]** is immediately on your left as you come through the Main Gate, right next to the Science Block. Over on the right, on the south edge of the pond, you will see a small hut [B] ― that used to be a visitor booth, however it is closed this term. Now walk straight north along the Central Path to the crossroads at East–West Walk. Just across East–West Walk, directly north of the Science Block, is our **Campus Bookshop [2 = C]**, where you can buy notebooks and lab manuals. Across the path on the east side, just north of the Central Lawn and Pond, you will find the **Student Café [3 = D]**, which serves hot lunches until three p.m. Finally, follow the Central Path all the way north to the Library. Ignore the space to the west of the Library [E], which is only for staff parking, and turn east, immediately to the right of the Library, to reach the **Sports Hall [4 = F]** in the northeast corner.

LISTENING SCRIPTS G, H, E & SPEAKING EXAMINER SCRIPTS S1–S3

Script G — Part 2 High-School Career Talk: Matching & Short Answer (Lesson 7 · #mission-career · 1:34)

Hello everyone, and thank you for inviting me to speak to high school students today about our Summer Youth Media Placement at Horizon Studios. First, each trainee joins one of four teams, so listen carefully to what each team actually does. Many students assume the **Podcast Team** writes news scripts all week [trap A], though in fact your main job there is **testing studio microphones and editing sound levels [1 = E]**. If you love outdoor work, the **Documentary Team travels out with local historians to film neighbourhood landmarks [2 = D]**. Over in the **Graphic Design Team**, we used to ask trainees to print concert posters [trap C], however everything is digital now, so you will be **creating social media animations for community events [3 = B]**. Finally, the **Archive Team** works quietly **scanning historic photographs for city museums [4 = F]**. Before we finish, three quick practical answers students always ask! First, when do applications close? The closing date is **12 May [Q1]**, so please do not wait until June. Second, how long does each placement last? Although induction takes just two days, the full placement runs for **three weeks [Q2]** in July. And finally, what must trainees wear on studio days? Leave formal suits at home — simply wear **comfortable shoes [Q3]** because you will be on your feet filming.

Script H — Part 3 Two-Speaker Research Seminar: Flow-Chart & Sentences (Lesson 8 · #mission-seminar · 1:16)

Dr. Patel: Come in, Kenji. Let us check the four stages of your river microplastics investigation before lab work starts next week. Have you finalized Step One yet?

Kenji: Yes, Dr. Patel. I originally planned to borrow plastic bottles [trap A] from the canteen, though obviously plastic containers could contaminate the water! So in Step One, we collect river water using clean **glass jars [1 = B]**. Then in Step Two, back in the lab, we pour each sample through a fine **metal filter [2 = C]** to trap tiny fibres.

Dr. Patel: Good thinking avoiding plastic bottles. Watch out in Step Three, though — sand grains will also sit on that filter alongside any plastic. How are you separating heavier grit before counting?

Kenji: Right — in Step Three we warm the trapped material gently in a **salt solution [3 = E]** so lighter plastic particles float to the surface. Then in Step Four, we identify the polymer types under an **optical microscope [4 = G]**. Overall, published studies show washing **synthetic clothing [S1]** is the biggest source of river fibres, and heavy rain makes fibre levels **double [S2]** soon after storms. Also, during lab sessions everyone must wear **cotton coats [S3]** so our own sleeves do not shed synthetic fibres!

Script E — Part 4 Academic Lecture: Choose TWO, Table & Summary (Lesson 9 · #mission-lecture · 1:17)

Good morning everyone. In today's environmental design lecture, we are looking at urban rooftop gardens and how cities build them safely. First, why are city councils investing in green roofs? Some people assume the main benefit is lower heating bills in winter, though in practice winter insulation gains were fairly small. What made a dramatic difference instead was summer cooling: plant layers kept **top-floor rooms significantly cooler during heatwaves [Part A: B]**. In addition, the soil beds **absorb heavy rainfall, which reduces pressure on street drains [Part A: D]** during storms. Harvested herbs are usually shared among residents rather than sold for profit. Turning now to how a rooftop garden is built, safety comes first. Before any soil is lifted up, the roof structure must be checked by an **engineer [B1]** to confirm the load limit. To keep weight down, the soil layer is typically just **fifteen (15) [B2]** centimetres deep, rather than the fifty centimetres needed for large trees. Because of that shallow soil, the most reliable plants are hardy herbs and shallow-rooted **flowers [B3]**. Finally, one unexpected maintenance problem: **insects [C1]** are quite rare high above the street, so pests are seldom an issue. Instead, strong **wind [B4 / C2]** dries the soil out rapidly, meaning automatic drip **watering [C3]** is essential.

Speaking Examiner Audio Scripts S1, S2 & S3 (#mission5 · #mission6 · #speaking3)

• **Script S1 (Part 1 Frame):** "Good afternoon. Can you tell me your full name, please? Thank you. First, let's talk about where you live: (1) What kind of town or neighbourhood do you live in? (2) What is the most interesting place to visit near your home? (3) Would you say it is a good area for students to live in? Now let's move on to daily routines: (4) What part of the day do you find best for studying, and why?"

• **Script S2 (Part 2 Card + Rounding-Off):** Hand student Task Card (*Describe a skill you would like to learn*), time **1:00 prep**, then say: "Remember you have one to two minutes for this, so do not worry if I stop you. Can you start speaking now, please?" At 2:00 ask: (1) *Do many people your age want to learn this skill too?* (2) *Do you think this skill will be useful in the future?*

• **Script S3 (Part 3 Abstract Discussion):** (1) Why do some adults continue learning new skills later in life? (2) Has the way people learn practical skills changed compared with your parents' generation? (3) Should schools spend more time teaching practical skills alongside academic subjects? (4) How might AI change university education over the next ten years?

MASTER ANSWER KEY (PART 1) — TEST DAY, LISTENING & SPEAKING

All keys match the auto-graded quizzes in 028 IELTS Academic Reviewer 1-for-1.

Module / Lesson	Exact Answer Key	Key Distractor / Teaching Note
Test Day Check (#testday)	1 **Listening → Reading → Writing** · 2 **One time only** · 3 **No (can be ±7 days)** · 4 **Raise hand before start** · 5 **~2 min check only**	Highlight the 2-minute computer check rule vs old 10-min paper transfer.
Listening L1 (#mission1)	1 **time** · 2 **price/number** · 3 **singular noun (thing)**	Have students mark N / V / Adj / Num in preview pauses.
Listening L2 (#mission2)	1 **cheaper / more affordable** · 2 **near / close to** · 3 **advantage** · 4 **problem / difficulty**	Watch word form on Q1: reduced → cheaper (not cheap).
Listening L3 (#mission3 · Script A)	1 **B (Wednesday)** · 2 **C (library entrance)** · 3 **A (£35)** · 4 **B (a notebook)**	Traps spoken first: Monday, reception, £50, laptop/headphones.
Listening L4 (#mission4 · Script B)	1 **thirteen/13** · 2 **thirty/30** · 3 **fifteen/15** · 4 **fifty/50** · 5 **18 June** · 6 **80 King Street** · 7 **Marco** · 8 **Brighton** · 9 **two tickets** · 10 **an affordable course**	Clap syllable stress: thir-TEEN vs THIR-ty.
Listening L5 (#mission-form · Script F)	1 **Chambers** · 2 **WS7 3PL** · 3 **beginner** · 4 **Thursday** · 5 **19** (£19) · 6 **padlock**	Traps: Tuesday (full) & £28 (adult rate). Don't drop -s in Chambers!
Listening L6 (#mission-map · Script D)	1 Support Desk = **A** · 2 Bookshop = **C** · 3 Student Café = **D** · 4 Sports Hall = **F**	Distractors: [B] closed hut; [E] staff parking west of Library.
Listening L7 (#mission-career · Script G)	**Part A Matching:** 1 **E** · 2 **D** · 3 **B** · 4 **F** **Part B Short Answer:** 1 **12 May** · 2 **three/3 weeks** · 3 **comfortable shoes**	Traps: [A] assumed news scripts; [C] past paper posters; '2 days' = induction only.
Listening L8 (#mission-seminar · Script H)	**Part A Flow-Chart:** 1 **B** (glass jars) · 2 **C** (metal filter) · 3 **E** (salt solution) · 4 **G** (optical microscope) **Part B Sentences:** 1 **synthetic clothing** · 2 **double** · 3 **cotton coats**	Trap [A] plastic bottles rejected due to contamination; 'an ____' cues vowel 'optical'.
Listening L9 (#mission-lecture · Script E)	**Part A Choose TWO: B + D** **Part B Table:** 1 **engineer** · 2 **15 / fifteen** · 3 **flowers** · 4 **wind** **Part C Summary:** 1 **insects** · 2 **wind** · 3 **watering**	Traps: winter heating gains small [A]; herbs shared not sold [C]; 50 cm is for trees.
Speaking P3 Check (#speaking3)	1 **b** (abstract society framing) · 2 **c** (intelligibility in any accent) · 3 **a** (stopping at 2:00 is normal)	Remind learners: Part 3 judges society-level analysis, not personal anecdotes.
Mini Check (#mission7 · Script C)	1 **24 October** · 2 **Room 2B / 2B** · 3 **confident speaking** · 4 **(a) notebook** · 5 **no charge / free**	Strict 2-word limit on all 5 items.

MASTER ANSWER KEY (PART 2) — READING, WRITING & GRAMMAR BOOST

Covers all 11 Academic Reading task types, 4 Writing labs, and 5 Grammar Boost lessons.

Module / Lab	Exact Answer Key	Examiner / Teaching Focus
Reading Lab 1 (#reading-practice)	**Part A:** 1 **ticket office** · 2 **seven / 7** · 3 **first** · 4 **(safety) helmet** · 5 **120** **Part B Table:** 1 **residents** · 2 **municipal grant** · 3 **48**	Compare Sentence Completion vs direct Wh-Short-Answer scanning.
Reading Lab 2 (#reading-tfng)	**Part A T/F/NG:** 1 **FALSE** · 2 **TRUE** · 3 **NOT GIVEN** · 4 **FALSE** · 5 **NOT GIVEN** **Part B Notes:** 1 **sand** · 2 **windowless** · 3 **streetlamps**	Q3 classic NG trap: passage mentions adult females only, never adult males.
Reading Lab 3 (#reading-headings)	**Part A Headings:** Para A = **iii** · Para B = **i** · Para C = **iv** **Part B Summary:** 1 **rest** · 2 **learning** · 3 **attention**	Distractor v ('cost of hospital scanners') preys on surface word matching.
Reading Lab 4 (#reading-matching)	**Part A Match Info:** 1 **A** · 2 **D** · 3 **D** (repeats!) **Part B Features:** 1 **B** (Kuiken) · 2 **C** (Chestek) · 3 **A** (Herr) **Part C MCQ:** Q1 = **B** · Q2 Choose TWO = **A + C**	Point out 'NB You may use any letter more than once' on Matching Info (D used twice).
Reading Lab 5 (#reading-ynng)	**Part A Y/N/NG:** 1 **NO** · 2 **YES** · 3 **NOT GIVEN** · 4 **YES** **Part B Endings:** 1 **A** · 2 **C** · 3 **D** **Part C Word-List Summary:** 1 **A (decline)** · 2 **C (growth)** · 3 **E (mobility)**	Remind students: write YES/NO on opinion tasks, never TRUE/FALSE.
Reading Lab 6 (#reading-diagram)	**Part A Diagram:** [1] **production well** · [2] **heat exchanger** · [3] **granite (rock)** **Part B Flow-Chart:** 1 **(fine) sand filter** · 2 **injection pump**	Notice [3] appears earlier in text than [1]–[2] — follow arrows on technical diagrams!
Writing Lab 1 (#writing-task1)	1 **b** (clear number-free Overview) · 2 **c** (outside speculation forbidden) · 3 **a** (train & walking)	Without a clear Overview, Task 1 Task Achievement is capped at Band 5.
Writing Lab 2 (#writing-process)	1 **b** (6-stage linear process Overview) · 2 **is collected / channelled / captured** · 3 **are trapped / removed / filtered**	Drill present simple passive (is/are + past participle) + non-mechanical sequencers.
Writing Lab 4 (#writing-examiner)	1 **b** (hedging: *tend to*) · 2 **a** (overusing *Firstly/Also/So*) · 3 **c** (under-length penalty; T2 = 2× weight) · 4 **b** (bullet points penalised)	Distilled directly from official ielts.org Examiner Comments PDF.
Grammar L1–L5 (#panel-grammar)	**L1 Hinshi:** 1 article · 2 conjunction · 3 adverb · 4 preposition · 5 aux · 6 adjective **L2 Forms:** 1 success · 2 successfully · 3 flexible · 4 educational **L3 Patterns:** 1 S+V · 2 S+V+C · 3 S+V+O · 4 S+V+IO+DO · 5 S+V+O+C **L4 Traps:** 1 b · 2 a · 3 c · 4 b · 5 a | **L5 X-Ray:** 1 notebook · 2 affordable · 3 register · 4 sharply · 5 sharp	Optional remediation for articles, S+V agreement, and gap-fill prediction.

PRINTABLE BAND 7.5+ WRITING MODELS — FOR CLASSROOM ANNOTATION

Have learners highlight: (1) Paraphrased Thesis/Intro, (2) Overview / Topic Sentences, (3) Hedging & Passive Structures.

Model 1 · Academic Task 1 Data Report — Student Commute Modes (157 words)

*The bar chart compares the proportions of upper-secondary students at a suburban school who used four types of transport to travel to school in 2010 and 2025. // **Overall**, cycling grew dramatically over the fifteen-year period to overtake rail travel as the most popular commute method. **By contrast**, the share of students taking the bus dropped by half, while train and walking figures changed only slightly. // In 2010, trains and subways were the leading choice at 38%, followed by bicycles at 28%. By 2025, however, bicycle use had **climbed sharply** to 44% — the highest figure on the chart — whereas rail use **edged down slightly** to 35%. // The remaining two modes accounted for smaller shares in both years. Bus commuting **fell markedly** from 22% in 2010 to just 11% in 2025. Walking stayed the least common option throughout the period, dipping slightly from 12% to 10% of students.*

Model 2 · Academic Task 1 Process Report — Campus Rainwater Harvesting (168 words)

*The diagram illustrates how rainwater is harvested, purified, and distributed for non-drinking use across a university campus. // **Overall**, the system consists of six sequential stages, beginning with the capture of rainfall on building rooftops and ending with the supply of treated water to campus washrooms and landscaped gardens. // **Initially**, rainwater falling on lecture-hall roofs **is channelled** into perimeter gutters and directed downward through a mesh leaf screen, where leaves and coarse twigs **are trapped** and diverted to a compost bin. **From there**, the screened water enters an underground settling tank, allowing heavier grit and sediment to sink gradually to the bottom. // **Once settled**, the clearer water **is pumped** upward into a sand and carbon filter that removes remaining fine particles and unpleasant odours. **Next**, the filtered water passes through an ultraviolet treatment chamber, where bacteria **are neutralised** by a UV lamp without adding chemicals. **In the final stage**, the purified water is held in a clean storage tank before being pumped to flush campus toilets and irrigate gardens.*

Model 3 · Academic Task 2 Discursive Essay — Online vs Classroom Learning (279 words · Band 7.5+)

*Rapid improvements in streaming platforms have prompted many educators to argue that online courses now rival traditional classroom teaching. **Although** virtual study can be remarkably effective for transmitting factual content to disciplined adults, **I would argue that** face-to-face classrooms remain superior wherever deeper discussion, practical skill-building, and learner accountability are required.*

***Admittedly**, well-designed online programmes offer flexibility that physical timetables cannot match. Learners can revisit dense lectures at their own pace and fit study around employment or caregiving responsibilities. A hospital nurse preparing for a specialist qualification, **for instance**, can review recorded seminars between shifts rather than spending hours commuting. Where the objective is mastering clearly structured content independently, virtual delivery **appears to perform** just as well as lecture halls.*

***Nevertheless**, effective education rarely consists solely of absorbing information. In a physical classroom, skilled teachers read subtle non-verbal cues, clarify misconceptions on the spot, and guide spontaneous debate among peers with competing viewpoints. Hands-on fields — from laboratory sciences to schoolteacher training — likewise depend on immediate feedback that video calls struggle to replicate. Equally important, scheduled in-person attendance creates social accountability, which helps explain why completion rates in purely self-paced online courses **tend to lag behind** campus programmes.*

***In conclusion**, while online courses provide an invaluable pathway for self-directed learners seeking flexibility, they complement rather than replace the interactive depth of classroom teaching.*

CLASSROOM PLAYBOOK — EIGHT 10-MINUTE NO-DEVICE OPENERS

Drop any single Mission Sheet into homeroom, English Expression, or exam-prep workshops.

Session	Handout Sheet	10-Minute Routine (Zero Student Devices Required)
1 · Orientation	Test Day Map (1p)	Walk through the 2026 computer rules (no breaks, 2-min Listening check, spellcheck OFF). Students tick personal target band.
2 · Part 1 Form	Mission Sheet 5	Two readers perform Script F live (Leo + Receptionist). Class catches Tuesday→Thursday & £28→£19 traps.
3 · Part 2 Map	Mission Sheet 6	Students put finger on 'MAIN GATE' facing North; teacher reads Script D once. Check A/C/D/F compass tracking.
4 · Seminar + Lecture	Mission Sheet 7	Read Script H (2 speakers) or Script E lecture signposts (*First / Turning now to / Finally*). Tally A/P/D/S/F errors.
5 · Reading T/F/NG vs Y/N/NG	Mission Sheet 10–11	Pairs prove why Sea Turtles Q3 is NOT GIVEN (adult males never mentioned) vs Q1 FALSE (contradicted).
6 · Technical Diagrams	Mission Sheet 12	Trace arrows on the Geothermal SVG cross-section; notice label [3] comes before [1] in text order.
7 · Task 1 Chart vs Process	Mission Sheet 13	Compare why Commute Chart uses past tense comparisons while Rainwater Process uses present simple passive.
8 · Speaking & Band 7+ Clinic	Mission Sheet 8 & 14	Pairs run timed 1:00 prep + 2:00 talk + 2 rounding-off questions using Cards 2 & 3, then upgrade 1 sentence with hedging.

Differentiating for Two Key User Groups (University 6.0–6.5 vs Teacher Registration 7.0×4):

• **High-School / University Applicants (Target 6.0–6.5):** Prioritise zero blank answers, strict word counts (*NO MORE THAN TWO WORDS* / 150w / 250w), clear 4-paragraph structure, and fixing the Top 5 JP→EN grammar traps (Card 12).

• **Educators / Postgraduate / NZQA & Teaching Council Applicants (Target 7.0 in EVERY skill):** Require all 4 bands min. 7.0 — use the **Band 7.5+ models** in Writing & Speaking, drill **academic hedging** (*tend to, appears to*), eliminate mechanical linkers, book **IELTS Academic on Computer at an authorised centre**, and remember **One Skill Retake** is accepted if a single skill misses 7.0.

Unofficial IELTS Academic resource — not affiliated with or endorsed by IELTS, British Council, IDP or Cambridge. Practice scores are not official band scores.
